

I am giving a Chess Dollar to anyone who can get Black out of this pickle! Black is just plain jacked up!!

It is Black's move.

Black's pieces

C5, RC6, A7, QD8, RF8, E5, F7, NF6, G4, H5, KG8

White's pieces

KG1, RF1, H2, G2, F2, NG5, QF5, D2, C2, BB2, B3, A4, BC4

The image shows a chessboard with a sidebar on the right. The chessboard has files A-H and ranks 1-8. The pieces are as follows:

Rank	A	B	C	D	E	F	G	H
8	Rook	Knight		King	King			Rook
7	Pawn	Pawn				Pawn		Pawn
6			Pawn			Knight	Pawn	
5				Pawn	Pawn	Pawn	Bishop	Bishop
4		Bishop	Bishop	Pawn				
3			Pawn	King		Knight		
2	Pawn	Pawn				Pawn	Pawn	Pawn
1	Rook				King			Rook

The sidebar is titled "Castling" and contains the following text:

Go Practice Page 6 of 24

In a game, Castling moves the King away from the center of the board where it's more vulnerable to attack. Note how much safer the two Kings are after they Castle. Here, White Castles Queenside, and Black Castles Kingside.
